• THE CONCEPT

- D3Track is an innovative solution making use of RFID technology in Airport Arrivals Passenger Baggage Screening.
- easyTrack is a total solution to identify the baggage which is identified as a suspect that the baggage could have a sub-species item in it. Based on the suspect the customs officer can tag the baggage, like drugs, arms, etc.
- The system can provide a dynamic alert by illuminating different light based on the suspects.
- Even thru the software the dynamic alert can be displayed based on the suspect.

Features

- Customized RFID Tag encoding
- Dynamic Hardware & software alerts
- Fully customizable solution
- Wide range of RFID Tag selection
- Wide range of Antenna selection
